Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

▲ ARIA input fields do not have accessible names	⌄

Additional items to manually check (10)   — These items address areas which an automated testing tool cannot cover. Learn ⌄ more in our guide on conducting an accessibility review.
